

Figure 1 displays 40 small plots arranged in a 4x10 grid. Each plot shows the effect of a specific combination of four factors (A, B, C, and D) on a response variable. The factors are: A (1, 2, 3, 4), B (1, 2, 3, 4), C (1, 2, 3, 4), and D (1, 2, 3, 4). The plots show various patterns of response, including linear trends, quadratic trends, and interactions between factors.
